

SFURTI – Scheme of Fund for Regeneration of Traditional Industries

Information Summary – Government of India

Important note

This is a prepared informational summary for educational and website-project use. It is not a replacement for the latest official SFURTI guidelines, scheme notification or application form. Confirm current procedures with the Ministry of MSME, KVIC, Coir Board or the concerned implementing agency.

1. About SFURTI

SFURTI stands for Scheme of Fund for Regeneration of Traditional Industries. It is a Government of India scheme under the Ministry of Micro, Small and Medium Enterprises (MSME). The scheme aims to organise traditional industries and artisans into collectives or clusters and improve their competitiveness, income and sustainability.

2. Objectives

- Organise traditional industries and artisans into clusters.
- Provide sustainable employment and improve artisan income.
- Improve skills, technology, tools, design, quality and packaging.
- Create common facilities and better market access.
- Preserve traditional skills while enabling modern business practices.

3. Industries covered

Traditional industries may include khadi, village industries, coir and other traditional craft or artisan activities such as handicrafts, handloom-related activities, bamboo, pottery, leather, metal craft, wood craft, food processing and other eligible traditional sectors, subject to scheme guidelines and approval.

4. Cluster approach

SFURTI supports groups of artisans and related enterprises located in a particular geographical area. A cluster may include common facilities, raw-material support, production infrastructure, training, design development, testing, packaging, branding and marketing support.

5. Types of clusters

The scheme generally provides for regular and major clusters, with the level of assistance depending on the approved cluster size, artisan coverage and project requirements. The current guidelines should be checked for the applicable project ceilings and norms.

6. Main assistance components

Support may cover technical assistance, mobilisation of artisans, capacity building, skill development, improved tools and machinery, common facility centres, raw-material banks, product development, quality improvement, packaging, brand building, market linkage, e-commerce and institutional support.

7. Eligible implementing organisations

Implementing agencies may include eligible Central or State Government institutions, Panchayati Raj institutions, NGOs, institutions of the Ministry of MSME, State-level agencies, private sector organisations and other approved bodies, subject to the current guidelines.

8. Beneficiaries

Primary beneficiaries are traditional artisans, craftspeople, workers, micro-enterprises, producer groups, self-help groups, cooperatives and other members of eligible traditional-industry clusters.

9. How the scheme works

1. Identify a traditional-industry cluster and artisan group.
2. Prepare a diagnostic study and detailed project report.
3. Submit the proposal through the prescribed implementing agency.
4. Obtain technical and administrative approval.
5. Establish common facilities and deliver training and other interventions.
6. Provide production, design, quality and marketing support.
7. Monitor cluster performance and artisan benefits.

10. Documents and information generally required

Cluster profile, artisan list, location details, industry/trade details, implementing-agency information, diagnostic study, detailed project report, budget, proposed facilities, training plan, market plan, bank details and other documents prescribed by the authorities.
